Package Contents

Pedometer device, wrist strap, metal clasp, manual

Instructions

- Wristband diagram:

Metal clasp
Wrist strap
USB port for charging
Plastic case
Touch button
OLED display

- Insert the USB portion of the device into the wrist band as shown; press down to lock it in place. The band can be adjusted to fit your wrist.
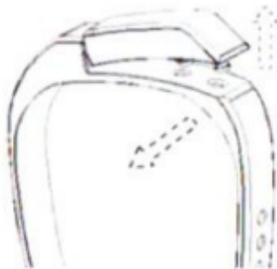

Insert the device as indicated by the arrows

Press down to secure the device in place

To remove, bend wristband as indicated by the arrows

Pull device out of the slot

Insert the device into a compatible USB port to charge. Charging time is about 2 hours with a 5V, 200mA power source.

NOTE: If the battery is completely drained, it will take one minute before the charging symbol will appear.

Main Functions

- The pedometer records your steps during walks and workouts; this information can be recorded for up to seven days. When syncing with your mobile device, data from the JoyBand will be accessible on your device and automatically backed up to the cloud.
- Calories are calculated based on recorded steps.
- Touch the screen button to display the current time.
- The JoyBand has built-in vibration reminders. This is set in the alarm clock settings and can by synchronized from the app.
- Press and touch the button 3 times quickly to enter the temporary exercise mode. Repeat to exit.
- The JoyBand vibrates with incoming calls when paired with your phone.
- The JoyBand will vibrate with incoming text messages when paired with your phone (Android only)
- The JoyBand will calculate your sleep data and analyze the quality of sleep in the app.
- Share exercise data via Twitter, Facebook, Google+, etc.

Companion App

- Apps available for iPhone and Android devices.
- Mobile device must support Bluetooth 4.0. Apple devices must be iOS 6.0 or later (iOS 7.0 recommended). Android must be v4.3+.
- To download the companion app, go to one of the following URLs or scan the QR code:

Android App

iOS App

- **Account Setup:** Register a new account or log in.

Charmring™
Welcom to smart blue bracelet

Login   Register

- Input your personal information when registering the first time. Gender, weight, age, height, etc. Click finish. The system will analyze your exercise data according to this info.

- Binding Your Bracelet. After login, the app will display "Search for bracelet" or "I do not have a bracelet". <u>Press the touch button to activate the wristband</u> and turn on the display, then click "Search for bracelet". The app should find your wristband within 30-60 seconds and show your bracelet ID. Click on the ID to finish the bind. If it could not find your bracelet, simply try again.

- After connecting, the app will go to the "personal" page. The data displayed should now match the data from the wristband. You should see "Connected" at the top of this screen. If you want to bind to another wristband, go to Settings -> My wristband -> Cancel Binding.

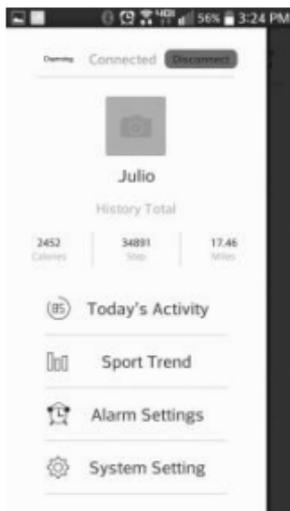

- On the main app page, you will see today's activity. Click the button in the top right to share exercise data with friends; click the top left button to go to the settings page.
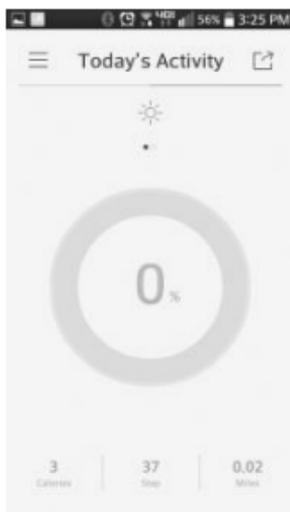

- Alarm clock setting: vibration reminders. From the app settings screen, go to More -> My bracelet -> Alarm clock setting.

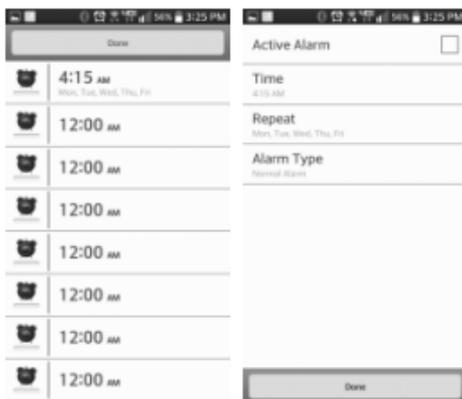

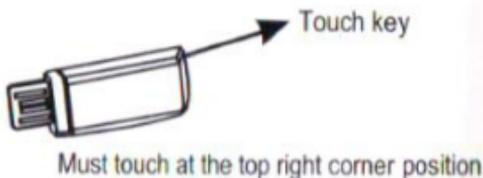

- Sleep mode setting. From the settings screen, go to More -> My bracelet -> Sleeping settings. The bracelet will monitor sleep activity during the window specified here.
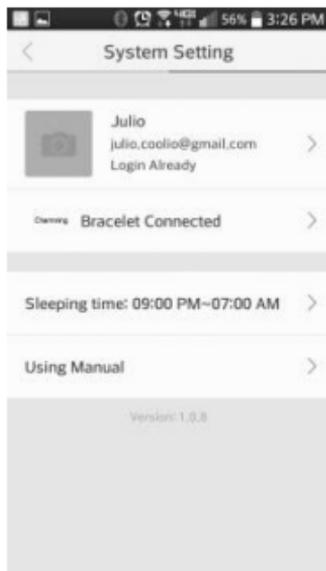

Quick Overview

- Press the touch button 3 times quickly to put the bracelet in temporary exercise mode. Repeat to return to normal mode.
- Normal mode.

Touch key
